Military Status: Completed | Address: Cairo, Egypt

Summary

Software Engineer specializing in mobile technologies with over **5 years of hands-on experience**. Successfully delivered scalable applications from scratch for diverse industries, driving user engagement through intuitive UI/UX optimization and adherence to Apple's Human Interface Guidelines. Skilled in bridging the gap between design and engineering, resulting in the successful launch and maintenance of top-rated apps on both iOS and Android platforms.

Education

Zagazig University

2015 – 2020

Bachelor's in Computer System Engineering

Zagazig, Egypt

Professional Experience

Ministry of Justice KSA

November 2022 – Now

[Najiz](#)

- Architected micro-frontend architecture, driving scalability, modularity, and maintainability across the application with more than **12** micro-apps.
- Created a design system with dark mode and accessibility, Elevated UX across more than **60** screens with **Flutter** and **Dart**.
- Streamlined the justice process for over **4 million** users by enabling virtual sessions between citizens and judges.

Jomla ECommerce

October 2019 – December 2022

[Jomlah](#)

- Built applications from scratch and enhance layouts and User Experience in existing iOS apps.
- Established a new protocol for assessing and modifying rejected applications to meet App Store standards, achieving a turnaround that reduced the average review time by 15 hours per week across the department.
- Collaborate with the quality assurance team to confirm app compatibility across platforms.
- *Jomlah Store (E-Commerce)* – Developed using iOS Native & Ionic Framework; deployed to both Android & iOS platforms

[Aqarmap Saudi](#)

- Spearheaded development of key features for Aqarmap with a team of 3 developers to Built Aqarmap, a real estate app, empowering users to compare investment returns across neighborhoods and properties using **Flutter** and **Dart**.
- Directed the team and managed daily operations to achieve project goals efficiently and on schedule.

Core Skills

Programming Languages: iOS (Swift, SwiftUI, Objective-C), Flutter (Dart), Ionic.

Tools: Git, SwiftUI, XML, Flutter, Coroutines, Flows, Gradle, GraphQL, Room Database, SQLite, GitHub, Xcode, CocoaPods, Firebase, Jira, Jenkins, Azure DevOps, Shared Preferences, unit, MVVM, MVI, RESTful Apis, Azure DevOps and Firebase.

Web Technologies: Angular, JavaScript, TypeScript, Node.js, HTML5, CSS/SCSS.

Fields of Experience: OOP, Design Patterns, Micro-frontends, Server Driven UI, Multithreading, Testing, Networking, CI/CD, Architecture Patterns, Responsive and Adaptive layouts.

Freelancing and open-source

- [Mawjood](#): Formulated an HR system to monitor working hours for 10K users using technologies such as Kotlin, **Coroutines**, **Room**, **Navigation Component**, **Retrofit**, **Dagger Hilt**, and **Clean Architecture**.
- [Guapa](#): Led the mobile development of Guapa for 10K users, a **Compose Multiplatform** mobile application that connects beauty service providers and clients covering both surgical and non-surgical procedures to maximize user benefits.
- [AnkiDroid](#): A powerful flashcard app designed to help users memorize and retain information with more than **10M** users, Migrated Anki to **Gradle composite Built**, implemented **version catalogs**, fixed bugs, and enhanced **unit testing**.
- [Sahl](#): Engineered an NFC-based payment solution for suppliers and cafeterias using Kotlin, Coroutines, and Compose. modularized code architecture resulted in a **40%** increase in transaction efficiency.
- [Bosta](#): Optimized app performance through image lazy loading in Jetpack Compose, enabling zooming, animations, and seamless image manipulations.
- [Dribbox](#): Created **adaptive layouts** using Jetpack Compose to support various screen sizes for enhanced usability and UX.
